L&R Recycled Metal Works

Focused on bringing character into your outdoor living areas and having a strong relationship with the community, at L&R Recycled Metal Works, we take pride in designing and constructing unique, hand crafted sculptures and firepits. This brand and construction project stems from the current year 9/10 elective '*Running a Business and Marketing*' run by Mr. Woodbridge. The elective allows students to create a business and bring it to life within the TAS community. Oliver Leadingham and I are the creators of the community orientated L&R Recycled Metal Works. We have put many hours and much brain power into planning our business as well as ensuring our product and finances are sound. Our goal with this project is to help raise a portion of money for a sponsor child, Ruksana, in Africa. Your purchase of our unique products will go towards helping an underprivileged child have a future. On top of all this we hope to please the TAS community with creative designs and friendly service.

Products

- Fire pits
- Small sculptures
- Medium sculptures
